## PROFESSIONAL SUMMARY

I am a dedicated Web Developer with a strong background in **WordPress**, front-end development, and a working knowledge of **PHP** and **Laravel**. I excel at solving problems using AI, online forums, and thorough research. With extensive experience both in freelancing and corporate settings, I bring a blend of creativity and technical expertise—whether working independently or leading a team.

## WORK EXPERIENCE

### Web Developer | Sukan (Netherlands) | Nov 2023 – Present

Developed and maintained **business websites** (e-commerce, service-based, product-based). Implemented **custom functionalities**, appointment booking systems, and online stores. Diagnosed and resolved **PHP and WordPress issues** to enhance performance. Optimized website speed and security through **caching, CDN, and SSL** configurations. Enhanced mobile responsiveness and improved UI/UX using **CSS** and **JavaScript**. Collaborated with international clients to understand business requirements and provide **custom solutions**. Integrated third-party APIs (payment gateways, CRM systems) to extend functionality.

### Freelance Web Developer | 2021 – 2023

Designed and developed **e-commerce and business websites** for diverse clients. Built a custom saree e-commerce platform with tailored UI/UX, branding, and SEO optimization. Developed websites using **WordPress**, **WooCommerce**, and **Laravel** for business automation. Enhanced website SEO through **structured data, meta tags, and keyword optimization**. Provided long-term maintenance and support, troubleshooting issues to ensure smooth functionality. Guided small business owners in digital transformation, transitioning from offline to online sales.

**Notable Projects:** Sukan | MAXGood | AJ Skin Clinic | AJ Skincare | AJ Nutricare | Enkinext | Fruit Frenzy | SK Adviesgroep | Flowvox |
